

I recently injured my leg with some glass, severed my tendons + nerves and lost all my muscle in my lower leg. I was referred to Aspen Rehab to rebuild my leg after surgery. Being a Gym owner and Personal Trainer, I thought I could do it on my own...I was wrong. Tim and his PT's (Physical Therapists) were professional, thorough, and I never felt like a number. I received one on one treatment throughout and most of all, success!
